

**We're improving the electric system
in your area**

January 2023

Dear Neighbor,

We understand how much you depend on reliable energy and we're continuously working to make it better. As you know, we're working on a project in your area that will help improve the reliability of the energy grid in good weather and bad.

This project will upgrade underground power lines beneath Collins Avenue near your property in Miami Beach. We will begin work between 5800 and 6345 Collins Avenue on Monday, Jan. 9, and expect to complete this portion of the project by mid-February 2023.

The work will require lane closures along Collins Avenue, starting Jan. 9 from 7 a.m. to 4 p.m. with one lane closure. The single lane closure will remain in place 24/7 for the duration of the work due to equipment staging needed to complete this work. Starting Jan. 22 until Feb. 3, nighttime work and a two-lane closure will be required from 9 p.m. to 6 a.m. We do not anticipate service interruptions related to this project. We thank you in advance for your cooperation and assistance on this project.

We pledge to work safely and respectfully in your community and make reasonable efforts to minimize construction-related noise and any other inconveniences to you and your neighbors.

Should you have any questions concerning this project, please contact FPL Associate Engineer Isabella Arcos at 305-377-6001 Monday through Friday, between 8 a.m. and 5 p.m. Please refer to the Collins Avenue underground improvement project.
